My Dear Patients,

Thank you for entrusting me with your eye care needs for these past several years. I'm writing to let you know of the changes coming to our practice and to assure you that we will still be here and available to continue to serve your eye health needs.

I have accepted a faculty appointment with UC Davis Health and, since UC Davis is where I received my training, I am proud to now be affiliating my practice with UC Davis Health, starting on September 1st! This means we can make additional eye and health services available to you here in Davis, and I will continue seeing patients in this same location – now joined by other UC Davis Health eye experts. Many of you have established long-term care with me, and I would be honored to continue providing your eye health care.

Since I will now be part of UC Davis Health, if you use "vision insurance" or "medical insurance" as part of your visit, it will be important to make sure your insurance allows you to receive services from UC Davis Health. We can check on this when we set up your next appointment. Alternatively, you can contact the UC Davis Health Patient Referral Center at 1-800-482-3284.

For those of you with a Sutter HMO plan, you'll be happy to know that UC Davis Health and Sutter Medical Foundation have reached an agreement that you'll still be able to receive care in our UC Davis Eye Center West office in Davis.

I look forward to continuing our health care relationship, and the additional services this affiliation will allow us to make available to all of our patients. Please call us with any questions or concerns. As always, we're here to help with your vision needs.

With warmest regards,

Robert B. Miller, M.D.
